(54) Title: METHOD AND RECORDING APPARATUS FOR RECORDING INFORMATION ON A MULTI-LAYER DISC

(57) Abstract: The invention relates to a method and apparatus for recording information on a multi-layer record carrier, especially a dual layer disc. By recording control information in a control information zone (311, 312, 321, 322) before recording user information after a layer jump, it is ensured that all user information can be read and recorded reliably, while the storage capacity of the record carrier for storing user information is not reduced.
